EDUCATION

Ain Shams University, Cairo, Egypt

Computer Science Student

SKILLS

Programming languages: C++, Java, Python, Arduino C.

Tools & Technologies: GitHub, Arduino.

Soft Skills:

- Public Speaking
- Self-Motivation
- Adaptability
- Team Collaboration
- Analytical Thinking
- Research & Analysis

EXPERIENCE

Cross-Platform Mobile App Development using Flutter

Jul 2026

Aug 2026

Information Technology Institute (ITI)

- Built fully functional, scalable, and responsive cross-platform apps that solve real-world problems.

Flutter Development

Dec 2025

May 2026

Route

- Gained hands-on experience and strengthened my skills in Dart, Flutter, State Management, REST APIs, and Firebase integration for app development.

Applied AI Training

Aug 2025

Sep 2025

Connect X Community

- Built a Python based Personalized Roadmap Generator leveraging RAG, FAISS, and LLMs to generate dynamic, skill-adaptive learning roadmaps.

PROJECTS

E-Commerce App

Aug 2026

- Developed a Flutter based application that features dynamic product catalog, category browsing, custom item components, and responsive layouts tailored for mobile devices.

Evently

Aug 2026

- Developed a Flutter based application that allows users to browse, search, filter, and organize events seamlessly.

Islami

Aug 2026

- Developed a Flutter based application that offers reading the Holy Quran, browsing Hadeth, using an interactive Digital Sebha, listening to Quran Radio, and staying updated with accurate Prayer Times.

Movies Explorer

Aug 2026

- Developed a Flutter based application featuring movie discovery, caching, and real-time data integration.

News App

Jul 2026

- Developed a Flutter based application with high-performance, responsive, featuring an elegant interface, multi-language localization support.

Movies App

May 2026

- Developed a Flutter based application with a modern and visually engaging graduation project for Route Academy.
- The app provides a complete movie browsing experience with authentication, watchlists, and rich movie details.

Solar System 3D Explorer

Apr 2026

- Developed a Flutter based application that allows users to explore the celestial bodies of our solar system through interactive 3D models and detailed scientific data.

Personalized Roadmap Generator

Apr 2025

- Developed a Python-based, AI-powered, fully offline-capable, personalized learning roadmap generator using Retrieval-Augmented Generation (RAG).
- The system creates adaptive, up-to-date roadmaps based on the user's skill level and goals, avoiding outdated, one-size-fits-all roadmaps.

LANGUAGES

Arabic - Mother Tongue, English –Intermediate (B1).
